Sounds good. I'll plan on hanging around until they get there and keep them entertained until Steve and crew are ready for them.

Laura if you're able to stay there just for the very beginning to make sure that they get linked up with Gladstone staff to get them taken up to the mine, and then leave at 5 o'clock I think that's fine I wouldn't see any need for you to be there during the sampling or to stay while they're doing it.

As far as I know it's only going to be two of the contractors from wright water engineering there to do the sampling I don't think that there are going to be any county personnel there with them.

Thank you

Mike Barry

Steve,

Cc ICP CGS

The La Plata County GKM Adit Sampling has been confirmed for Tuesday. See below my email extending the invite per the conditions Mine Ops set and associated logistics. I only committed that the samples should be taken from an area upstream of the shotcrete install as far as possible given safety and access considerations.

Steve, if I should cc anyone else on your end, please let me know. I'll send you a short text as well.

Thanks,

Mike Barry | Cell: 617.680.5466 | barry.michael@epa.gov

Subject: La Plata County GKM Adit Sampling Event week of 9/28

Hi Sheryl and Matt,

EPA is pleased to offer Tuesday, 9/29, at 5 pm to support La Plata County/Wright Water Engineer's sampling of mine water from the GKM Adit. Does this work for you?

We understand that Wright Water Engineer's will provide all sampling containers, apparatus, etc. And will be sending the samples for analysis to a lab of it's arrangement and cost. Please let us know if that isn't correct. EPA or EPA contractors will provide transport from the Gladstone Command Post, site escorts and safety monitors. EPA also intends to draw samples for the constituents whose hold times were not met in the sampling last week. Samples should be drawn from mutually agreed upon locations by field personnel, upstream of where shotcrete operations have occurred as far as possible, given safety and access considerations.

Logistics:

Please have personnel arrive at the Gladstone Command Post to be ready to be transported to the GKM Adit by approximately 4:30-4:45 pm. Personnel should have Level D gear (safety shoes, hard hat, orange or yellow safety vest and safety glasses) in addition to any PPE for sampling. Note that active work for the day will have concluded at this time.

Please provide the number of personnel & approx. amount of equipment needed to transport.

Gladstone Command Post Points of Contact.

Command Post Watch Line: 303.954.4719 (this is the best way to contact)

POC: Steve Way, cell: 303 886.1640

Thank You

Mike
